

Clarke CTR3000 Transformer

Specifically designed to reduce voltage to a prescribed safe working level, this general duty transformer is especially useful for building and construction sites. Enclosed in tough moulded glass fibre case, the CTR3000 will supply power for lighting, power tools and similar equipment.

- Power tool rating - 3300VA with overload circuit protection
- Voltage input - 230V AC. Voltage output 110V AC
- Dual outlet sockets (3 pin round) to BS4343. 2 x 16Amps
- Centre tapped to earth
- Complies with BS3535 (EN60742) standards
- Features include a carry handle, arctic grade power cable, & fitted 13Amp plug

Technical Specification

Power Tool Rating:	3300VA
Sockets Outlets:	2
Dimensions LWH:	236x195x265mm
Packaged Weight:	16.13kg
