

LITEguard Manhole Boxes - SEH3025

The TectoGroup[®] LITEguard Manhole Boxes are lightweight shoring panels designed to use around manholes, pits and pump stations. They allow for quick, easy construction and installation of precast concrete manholes, small chambers and tanks.

- Size: 2400mm X 1965mm X 56mm
- Weight: 211Kg

Main Features

- For use in dig and place
- Can be stacked
- Allows for faster manhole construction without the need for the worker to enter the excavation
- Telescopic spreader bar option

Technical Data

- Panel Length: 2400mm
- Panel Height: 1965mm
- Working Load Limit: 32kN/m²
- Panel Thickness: 56mm
- Under Strut Clearance: 560mm
- Unit Weight inc. 1000m Struts: 505Kg
